Detail : Glam Green Rose

During installation, Glam Green & Silver ROSE tiles may present craqueleure (glaze surface cracking). Moisturized tiles increases their volume, which tenses the glaze. When dry, the piece volume decreases and the crackles disappear. We recommend using grout with similar color and tone to the tiles. Grouting avoids moisture to penetrate the tile and also seals all the crackles, so it can be used in wet areas.

Do not let the grout excess dry, and proceed to clean with plenty of water. Clean with soap and water quickly before it dries. You can use a mild anti-limescale cleaner to completly clean the surface. Strong anti-limescale cleaners can damage the metal bright areas, making the darkest shades turn matt.

Use only PH Neutral products to clean.

Durante la colocación del Glam Green & Silver ROSE las piezas pueden craquelar. Al humectar las piezas, aumenta su volumen, lo que produce tensión en el vidriado. Cuando la pieza pierde la humedad, disminuye su volumen y las crepitaciones desaparecen.

Se aconseja emplear juntas de un color y tono similar al de las piezas. Además de que la junta sella la entrada de humedad al reverso de la pieza, también sella todo el craquelado, por lo que se puede emplear en zona húmedas.

No dejar secar la junta para proceder a limpiar con abundante agua. Una vez instalado se puede limpiar con agua y jabón. Si aún hay restos, se puede limpiar con un limpiador de cal de poca intensidad. Los limpiadores de cal fuerte pueden dañar el brillo de las zonas metálicas, matificando un poco las zonas oscuras de la pieza.

Limpiar solo con productos PH Neutro.

Paladio Ochre Decor		G-7298

During installation, Paladio Ochre and Cobalt tiles may present craqueleure (glaze surface cracking). Moisturized tiles increases their volume, which tenses the glaze. When dry, the piece volume decreases and the crackles disappear.

We recommend using grout with similar color and tone to the tiles. Grouting avoids moisture to penetrate the tile and also seals all the crackles, so it can be used in wet areas.

Do not let the grout excess dry, and proceed to clean with plenty of water. Clean with soap and water quickly before it dries. You can use a mild anti-limescale cleaner to completly clean the surface. Strong anti-limescale cleaners can damage the metal bright areas, making the darkest shades turn matt.

Use PH Neutral products to clean.

Durante la colocación del Paladio Ochre y Cobalt las piezas pueden craquelar. Al humectar las piezas, aumenta su volumen, lo que produce tensión en el vidriado. Cuando la pieza pierde la humedad, disminuye su volumen y las crepitaciones desaparecen.

Se aconseja emplear juntas de un color y tono similar al de las piezas. Además de que la junta sella la entrada de humedad al reverso de la pieza, también sella todo el craquelado, por lo que se puede emplear en zona húmedas.

No dejar secar la junta para proceder a limpiar con abundante agua. Una vez instalado se puede limpiar con agua y jabón. Si aún hay restos, se puede limpiar con un limpiador de cal de poca intensidad. Los limpiadores de cal fuerte pueden dañar el brillo de las zonas metálicas, matificando un poco las zonas oscuras de la pieza.

Limpiar con productos PH Neutro.

During installation, Elements COBALT tiles may present craqueleure (glaze surface cracking). Moisturized tiles increases their volume, which tenses the glaze. When dry, the piece volume decreases and the crackles disappear.

We recommend using grout with similar color and tone to the tiles. Grouting avoids moisture to penetrate the tile and also seals all the crackles, so it can be used in wet areas.

Do not let the grout excess dry, and proceed to clean with plenty of water. Clean with soap and water quickly before it dries. You can use a mild anti-limescale cleaner to completly clean the surface. Strong anti-limescale cleaners can damage the metal bright areas, making the darkest shades turn matt.

Use PH Neutral products to clean.

Durante la colocación del Elements COBALT las piezas pueden craquelar. Al humectar las piezas, aumenta su volumen, lo que produce tensión en el vidriado. Cuando la pieza pierde la humedad, disminuye su volumen y las crepitaciones desaparecen.

Se aconseja emplear juntas de un color y tono similar al de las piezas. Además de que la junta sella la entrada de humedad al reverso de la pieza, también sella todo el craquelado, por lo que se puede emplear en zona húmedas.

No dejar secar la junta para proceder a limpiar con abundante agua. Una vez instalado se puede limpiar con agua y jabón. Si aún hay restos, se puede limpiar con un limpiador de cal de poca intensidad. Los limpiadores de cal fuerte pueden dañar el brillo de las zonas metálicas, matificando un poco las zonas oscuras de la pieza.

Limpiar con productos PH Neutro.

TECHNICAL FEATURES

CARACTERÍSTICAS TÉCNICAS

ANCHORING. Stainless steel of AISI 304 alloy / acero inoxidable de aleación AISI 304	
Electrical Properties / Propiedades Eléctricas	
Electrical resistivity / Resistividad eléctrica	70-72
Physical Properties / Propiedades Físicas	
Density / Densidad (g cm ⁻³)	7.93
Melting point / Punto de fusión (C°)	1400-1455
Mechanical Properties / Propiedades Mecánicas	
Elongation / Alargamiento %	<60
Brinell hardness / Dureza Brinell	160-190
Izod impact / Impacto Izod (J m ⁻¹)	20-136
Elasticity module / Módulo de elasticidad (Gpa)	190-210
Traction resistance / Resistencia a la tracción (Mpa)	460-1100
Thermal Properties / Propiedades Térmicas	
Thermal expansion coefficient / Coeficiente de expansión térmica 20-100C (x10 -6 K -1)	18.00
Thermal conductivity / Conductividad térmica a 23 °C (W m -1 K -1)	16.30

* For pricing on grooved material for hidden system, please check with our commercial department. En el caso de solicitar material ranurado contactar con el dep. comercial.
The price includes staple, plug and screw. El precio por anclaje incluye también el taco y el tornillo.

Cleaning And Maintenance Tips

THE FIRST CLEANING “AFTER INSTALLATION”

The most important cleaning operation is performed immediately after laying the tiles. This involves the complete removal of residues and dirt from the tile placement. An inadequate or late removal of this waste can create a cementitious layer on the tile capable of absorbing all forms of dirt. This may give the impression that the tile gets dirty when the actual problem resides in the surface film of dirt which was not removed immediately after laying. Once the grouting of the tiles is finished, it is important, while the grout is still wet, to carefully remove any excess material immediately. This can be done using a sponge and plenty of clean water, repeating this as many times as necessary. Do not perform the cleaning with metal tools, scrapers or abrasive pads. For stubborn stains, clean with alcohol and lukewarm water and rub with a clean cloth. If they do not disappear, check with the relevant technical department. Once the above mentioned washing is done, another washing should be carried out using basic or alkaline degreasing agents, as acid washing can leave stickiness on the pavement which could help retain dirt. In areas where water is calcareous, it is convenient to dry the surface, in order to prevent the deposition of carbonates which will reduce the surfaces' gleam.

REGULAR MAINTENANCE

Many available cleaning products for general use can be used with our products. For daily cleaning, one can use detergents or degreasing products diluted in warm water, following each product's instructions. It is important that the cleaner does not have oil, animal fat, or soap base. These components may leave an invisible residue whilst absorbing dirt (lime stratifications detergent or residues). It is also important that the tile receives a thorough rinsing with clean water after the cleaning process is complete.The low water absorption and high standards met by all porcelain tiles ensure a product which is easy to maintain. Our products do not require the use of sealants or waxes. These superficial coatings can really affect the performance of the tile in a negative manner. It is important to note that hydrofluoric acid (HF) and derivatives can irreparably damage the tile.

The general steps for regular cleaning of our ceramic products can be summarized as follows:

- Remove any solid or liquid waste from the tile, sweeping with a soft bristle broom or vacuuming.
- Clean up liquid spills as soon as possible with lukewarm water.
- Apply the recommended amount and dilution of the cleaner for the tile (follow the cleaner manufacturer's instructions). The wiper must remain in the tile a minimum period of 5 minutes.
- For unpolished tiles, scrub with a nylon sponge or soft bristle brush. A floor machine equipped with a nylon pad or bristle brush can be used for heavily soiled surfaces. For polished tiles, clean with a nonabrasive cloth.
- Remove the dirty cleaning solution and water with a vacuum cleaner or cloth. Rinse the porcelain tile with clean water and remove again with a vacuum cleaner, mop or towel. It is absolutely essential that all detergent residues are removed completely from the tile. Any remaining detergent that dries on the tiles surface can form a coating that can trap dirt and be very difficult to remove. The tile should be rinsed several times to remove all detergent residues.
- During use, the cleaning of the tiles should be similar to window cleaning. Ammonia and even bleach type products can be employed, but both must be diluted in water.

In case of special stains and/or particularly resistant, it is advisable to use specific detergents according to the cleaners' manufacturer. Do not forget that removing any type of stain is easier when it is still fresh.

It is important to always do a pre-test the detergent products result on a small sample of the porcelain.

TILES WITH METALLIC EFFECTS - PVD

This type of tiles require following these recommended guidelines, shown below, for cleaning:

- In general, you can use any non-aggressive and neutral pH product.
- In general, we recommend the use of ammonia-based products (NH3) diluted in water, never directly on the piece.
- You cannot use chemically aggressive products.
- You cannot use products with hydrochloric acid (HCl). The remaining acid products should be used with caution in very diluted concentrations.
- Citric acid and other acidic food products leave stains if left too long to act on the tile. They must be removed as soon as possible.
- The use of powder products of abrasive action is not recommended.

Consejos De Limpieza Y Mantenimiento

LA PRIMERA LIMPIEZA DESPUÉS DE LA COLOCACIÓN

La operación de limpieza más importante se lleva a cabo inmediatamente “después de la colocación de la baldosa”. Esto implica la eliminación completa de los residuos de lechada y de la suciedad de la colocación de las propias baldosas. Una eliminación inadecuada o tardía de estos residuos puede crear sobre la baldosa una película cementosa capaz de absorber toda forma de suciedad, dando la impresión que se ensucia la baldosa, cuando el problema está en la película superficial de suciedad. Una vez efectuado el rejuntado de las baldosas, es importante cuando el material de rejuntado todavía está fresco, eliminar el material sobrante cuidadosa e inmediatamente, utilizando para ello una esponja y agua limpia abundante, repitiendo esta operación tantas veces como sea necesario. No debe realizarse la limpieza del material con espátulas metálicas ni estropajos abrasivos. En el caso de manchas resistentes, limpiar con alcohol y agua caliente y frotar con un paño limpio. Si no desaparecen, consultar con el departamento técnico correspondiente. Una vez efectuado el lavado mencionado arriba, deberá efectuarse un lavado básico o alcalino utilizando detergentes desengrasantes, ya que el lavado ácido puede dejar una untuosidad sobre el pavimento que podría contribuir a retener la suciedad. En aquellas zonas donde el agua sea calcárea conviene secar la superficie para evitar la deposición de carbonatos que disminuyen el brillo superficial.

EL MANTENIMIENTO REGULAR

Muchos productos de limpieza de uso general que están disponibles son aceptables para el uso en nuestros productos. Se puede emplear para la limpieza diaria detergentes o desengrasantes diluidos en agua caliente, según indicaciones del envase del limpiador. La densidad inherente y baja absorción de agua de todos los productos aseguran un producto que es fácil de mantener.

Es muy importante tener en cuenta que el ácido Fluorhídrico (HF) y derivados pueden dañar irremediablemente la baldosa.

Los pasos generales de limpieza regular para nuestros productos cerámicos se pueden resumir del siguiente modo:

- Retirar cualquier residuo sólido o líquido de la baldosa, barriendo con una escoba de cerdas suaves o pasar la aspiradora.
- Limpiar los derrames líquidos tan pronto como sea posible.
- Aplicar la cantidad y dilución del limpiador recomendadas para la baldosa (ver indicaciones del fabricante del limpiador). El limpiador deberá permanecer en la baldosa un periodo mínimo de tiempo de 5 minutos.
- Para baldosas sin pulir, frotar con una esponja de nylon o un cepillo de cerdas suaves. Para superficies muy sucias puede usarse una máquina de piso equipado con una almohadilla de nylon o con un cepillo de cerdas. Para baldosas pulidas , limpie con un trapo no abrasivo o un paño.
- Retirar la solución de limpieza sucia y el agua con una aspiradora o un trapo. Enjuague la pieza con agua limpia y retire de nuevo con una aspiradora, fregona, o una toalla. Es absolutamente esencial para todos los residuos de detergente que se eliminen por completo de la baldosa. Cualquier resto de detergente que se seque sobre la baldosa puede formar un recubrimiento que puede atrapar la suciedad y será muy difícil de eliminar. La baldosa debe enjuagarse varias veces para eliminar todos los residuos de detergente.

Durante su uso, la limpieza de la baldosa debe hacerse de forma similar a la limpieza de cristales. Se puede emplear productos de tipo amoniacal e incluso lejía, ambos diluidos en agua.

En caso de manchas particulares y/o especialmente resistentes, es aconsejable usar detergentes específicos según especificaciones del fabricante del limpiador. No hay que olvidar que la eliminación de cualquier tipo de mancha resulta más fácil cuando ésta todavía está fresca.

Es importante hacer siempre una prueba previa antes de usar los productos detergentes.

BALDOSAS CON EFECTOS METÁLICOS / PVD

En este tipo de baldosas por su especificidad se recomienda seguir las siguientes pautas de limpieza:

- En general, se puede usar cualquier producto no agresivo y con PH neutro.
- En general, se recomienda el uso de productos con base amoniacal (NH3) en concentración rebajada, nunca directamente sobre la pieza.
- No se pueden usar productos agresivos químicamente.
- No se puede usar productos con ácido clorhídrico (HCl). El resto de productos ácidos deben usarse con precaución en concentraciones muy rebajadas.
- El ácido cítrico y otros productos alimentarios ácidos dejarán mancha si se les deja actuar mucho tiempo sobre la baldosa.
- No está recomendado el uso de productos en polvo de acción abrasiva.

Fixing Tips

CARE TO BE TAKEN DURING THE CONSTRUCTION

Our ceramic products can be considered as a final finish in the construction process, so it is advisable to be laid only when the rest of the building works are complete (structures, masonry, flooring, ceilings...); specially the flooring. This will minimize the collateral damage that sometimes occurs when the product is being placed too soon.When porcelain tiles are placed before the end of the construction, one must take special care to protect the piece until the works are finalized.

PRE-FIXING ISSUES

- Upon receiving porcelain tiles it is essential to check if the tone, size and quality meet the required standards in advance, as well as assuring the lack of any visible surface defects. In case of facing any problems, our technical team will be able to study these when informed before laying the product.
- One must choose the proper tools for laying ceramic products (serrated edged comb, rubber mallet, suction cups, spreaders and clamps for laying, jointing rubber float, ...)
- Mix pieces from different boxes.

SUPPORT BASE PREPARATION

The support base for wall or floor for the tiles must be stable, dry, flat and it must have the adequate consistency. This base must never be too hot nor too cold and should be clean. One must not forget to clean any dust, grease or oil leftovers to facilitate an optimal adhesion.It is convenient to use slightly rough support bases, altering any excessively smooth leveling layer, in order to ensure greater adherence.

ADHESIVE CHOICE

The type of adhesive will be determined by the water absorption of each type of tile. In our case, it is advisable to employ the technique of placing a thin layer of cement adhesive of type C2.For formats larger than 30x30cm, we recommend the double-layer-adhesive. This technique involves the appliace of adhesive on the support base as well as on the tile; this technique is strongly recommended for outdoors.The bonding material must be applied with serrated edged comb to achieve a homogeneous adhesive distribution throughout the laying surface, even in the corners of the tile. A non-uniform adhesive layer will cause tensions on the tile, which will create an “eyebrow” effect. It is advisable to follow the instructions of the adhesives manufacturer, particularly for different cement-based bonding materials.

TILE INSTALLATION

The previous handling of the tiles, especially the rectified, must be done with utmost care to avoid scratches or chipping of the tiles. During the fixing process, the surface shall not be marked by graphite materials (pencils) or permanent markers, especially in the case of polished products to avoid potential cleaning problems. In the placement of tiles the use of at least 2mm spreaders is advisable. For locked placement, it is advisable to fix at a distance from 1/3 of the piece, never at half of the piece. In large format porcelain pieces (over 60cm of any of its sides) it is convenient to use leveling clips to ensure the flatness of the pieces (such as the Raimondi leveling system, although there may be other manufacturers recommended in the market).Ç

JOINTS AND GROUTS

The main functions of installation joints are: to absorb deformations of the support, to increase surface adhesion between the parts and the bonding material, and to improve the impermeability of the surface. It is necessary to respect the indications given below:

- Structural joints:** the construction project already takes into account the existence of these joints in the floor coverings. These must also abide when covering the joint with plastic trims.
- Perimeter joints:** it is always appropriate to provide these joints that isolate the tile and bonding material from any structural movements, avoiding tensions with them. Perimeter joints are normally hidden by the skirting board or the tile itself; they must have a width of 5 to 10 mm, and may be empty or filled with deformable material.
- Expansion joints:** allow deformations due to thermal and hygroscopic variations between tiles between the bonding material and the support base. Usually designed with a width of 5-8 mm and surfaces from 25 m2 (in sections of 5x5 m2) indoor and surfaces from 9 m2 (in sections of 3x3 m2) outdoors. These joints must be well executed, this means that they must be flexible, waterproof, well bonded and must reach the base support.
- Installation joints:** those between tiles. Before grouting these must be empty, without any bonding materials. It is not recommended to fix any floor without joints, advising a minimum joint of 2-3 mm The grout used in installation joints must be applied with a rubber float. The market offers a wide range of grouts, which are suitable for each type of tile and temperature as specified by the manufacturer of the grout, in which the type of product to be used, colors and waiting time before grouting should be recommended.

Before grouting, it is advisable to test a small area of the part to determine whether the chosen grout affects or stains the surface of the piece. In this case, one should contact the grout manufacturer. Ask the manufacturer for a suitable cleaner for this type of grip material. A bonding material with a thin granulometry is desirable in order to avoid scratches on the tile during its placement.

Consejos De Colocación

CUIDADOS A SEGUIR DURANTE LA CONSTRUCCIÓN

Nuestros productos se pueden considerar acabados finales en la construcción, por ello es recomendable ser colocados sólo cuando el resto de los trabajos constructivos hayan finalizado (estructuras, mampostería, solados, techos, instalaciones,...) y en especial los productos porcelánicos para suelos. De este modo se minimizarán los daños que pueden experimentar el producto cerámico por haber sido colocados demasiado pronto. Cuando los productos porcelánicos son colocados antes de finalizar la construcción hay que tener especial cuidado para proteger la pieza hasta que se ponga en servicio normal de utilización.

CUESTIONES PREVIAS A LA COLOCACIÓN

- Al recibir los productos cerámicos es importante previamente comprobar si el tono, calibre y calidad son los requeridos, así como la existencia de defectos superficiales visibles.
- Hay que elegir las herramientas y útiles adecuados para la colocación de los productos cerámicos (llana metálica dentada, maza de goma, ventosas, crucetas y grapas para la colocación, llana de goma para rejuntar, ...)
- Hay que mezclar piezas de varias cajas.

PREPARACIÓN DEL SOPORTE

El fondo o soporte para pared o suelo sobre el que se colocarán las baldosas debe estar estable, seco, nivelado o aplomado con la consistencia adecuada, no debiendo estar ni helado ni excesivamente caliente y limpio sin restos de polvo, grasa o aceite. Es conveniente disponer de soportes rugosos alterando los soportes excesivamente lisos o la propia capa de nivelación ligeramente para garantizar mayor adhesión.

ELECCIÓN DEL ADHESIVO

La elección del tipo de adhesivo vendrá determinada por la absorción del agua de cada tipo de baldosa. En nuestro caso, se aconseja emplear la técnica de colocación en capa fina con el uso de Adhesivos Cementosos tipo C2. Para grandes formatos superiores a 30x30cm, se recomienda la técnica de colocación de doble encolado, esto es, aplicar adhesivo sobre el soporte y en la baldosa, en especial en exteriores.

El material de agarre debe aplicarse con una llana dentada para conseguir una distribución del adhesivo homogénea por toda la superficie de colocación incluso en las esquinas de la baldosa, presionando la baldosa sobre el adhesivo todavía fresco. De no ser uniforme la capa de adhesivo provocará tensiones en la baldosa que generan a la larga el efecto “ceja”. Es conveniente seguir las instrucciones del fabricante de adhesivos, en especial para los soportes diferentes de base cementosa.

COLOCACIÓN DE LAS BALDOSAS

La manipulación previa de las baldosas, en especial las rectificadas, ha de realizarse con el máximo cuidado, para evitar despuntados, rayas o desconchados en su superficie. Durante la colocación, no deberá marcarse la superficie de utilización del material con lápices (grafito) o rotuladores indelebles, especialmente en el caso de los productos pulidos para evitar posibles problemas de limpieza de los mismos. En la colocación de las baldosas se recomiendo el uso de crucetas de al menos 2 mm. En colocación trabada es aconsejable la colocación a una distancia de 1/3 de la pieza, nunca a la mitad de la pieza. En pavimentos de grandes formatos (mayores de 60 cm en alguno de sus lados) es conveniente el uso de grapas de colocación para garantizar la planitud de las piezas (se recomienda el modelo de la marca RAIMONDI, aunque puede haber otros fabricantes en el mercado).

LAS JUNTAS Y REJUNTADOS

Las principales funciones de las juntas de colocación son: absorber deformaciones del soporte, aumentar la superficie de adherencia entre las piezas y el material de agarre, y mejorar la impermeabilidad de la superficie. Es conveniente respetar las juntas que se indican a continuación:

- Juntas estructurales:** el proyecto constructivo ya tiene prevista la existencia de estas juntas en el solado que se deben respetar también al colocar las baldosas y éstas se deben recubrir con materiales deformables.
- Juntas perimetrales:** siempre es conveniente prever estas juntas que aíslan la baldosa y al adhesivo de los movimientos de otros elementos estructurales constructivos como paredes-suelos, pilares o puertas-ventanas, evitando tensiones con ello. Normalmente quedan ocultas por el rodapié o la propia baldosa, deben tener una anchura de 5 a 10 mm, y pueden quedar vacías o rellenas de material deformable.
- Juntas de dilatación:** permiten las deformaciones por variaciones térmicas e higroscópicas entre baldosas, adhesivo y soporte. Normalmente se diseñan con una anchura mínima de 5 a 8 mm y en superficies a partir de 25 m2 (en paños de 5x5 m2) en interiores y en superficies a partir de 9 m2 (en paños de 3x3 m2) en exteriores. Estas juntas deben estar bien ejecutadas, esto es, ser flexibles, impermeables, bien adheridas y llegar hasta el soporte base.
- Juntas de colocación:** son las existentes entre baldosa y baldosa. Antes del rejuntado estas juntas deben estar vacías, por tanto sin materiales de agarre de la construcción. Se desaconseja una colocación a junta unida o a “testa” aconsejándose una junta mínima de 2-3 mm.

El material de rejuntado que se utiliza en las juntas de colocación se debe aplicar con una llana de goma. En el mercado existe una amplia gama de materiales de rejuntado, que se adecua a cada tipo de baldosas y ambiente según especificaciones del fabricante del material de rejuntado en las que se debe recomendar el tipo de producto a emplear, colores y tiempo de espera hasta el comienzo del rejuntado. Antes del rejuntado, es conveniente probar en un área pequeña de la pieza para determinar si la lechada elegida decolora o mancha la superficie de la pieza, en cuyo caso hay que contactar con el fabricante del material de rejuntado. Pedirle al fabricante del rejunte un limpiador adecuado para este tipo de material de agarre. Es conveniente que la granulometría del material de rejuntado sea fina, para evitar posibles rayas en la baldosa en su colocación.

General Conditions Of Sale

1. REGULATIONS FOR CONTRACTING

The general conditions of sale here detailed, except for any possible modifications or exceptions agreed in writing, shall govern all sale contracts concluded between APAVISA PORCELANICO S.L (hereinafter the Seller) and the Buyer. Any variations of the general conditions of sale, offers, transactions, credits or discounts, agreed by the Agents or other intermediaries of the Seller, will not be considered valid without the written confirmation of staff at the Seller's Head Office.

2. PURCHASE AND SUPPLY ORDERS

Only purchase orders received in writing will be valid, these being subject to the acceptance of the Seller by Order Confirmation. The supply shall include only the services, materials and quantities specified in the Order Confirmation or in other written communications by the Seller.

Should there be any differences in the request for order or Purchase Order, the Order Confirmation or pro forma invoice is to be considered the only valid document. A Partial Confirmation of the Order communicated in writing by the Seller means that the approval is partial and does not entail or imply confirmation of the rest of the requested order.

3. DELIVERY

Unless expressly agreed otherwise, the place of loading and the terms of sale of the Seller shall be indicated in the invoice and the delivery conditions will be "Ex Works" according to the INCOTERMS rules of the International Chamber of Commerce.

In any case, the full responsibility for deterioration, breakage or loss of product during the loading and transportation shall be borne by the Buyer.

The buyer must verify the integrity of the merchandise within a maximum period of 24 hours from receipt. Any broken or missing material communicated subsequently shall be understood as neither attributable to nor the responsibility of the Seller.

The costs for the return of the merchandise due to any errors or causes beyond the responsibility or control of the Seller, shall be fully borne by the Buyer.

4. DELIVERY TERMS

The delivery term shall be agreed by the contracting parties. Provided that special clauses have not been included, the delivery term will be for information purposes only and will not be understood as mandatory or a binding condition.

Any event of force majeure will interrupt the delivery term while the event lasts. If, as a result of force majeure, the contract cannot be executed within 60 days of the date agreed upon, each party shall be entitled to terminate the contract. In such case, the declaration of termination must be sent to the other party by registered letter with return receipt within 10 days from the expiry of said period of 60 days, excluding any reciprocal rights to compensation or reparation of damages suffered.

5. PRICES AND PAYMENTS

The valid price will be established by the Seller' in the corresponding invoice.

The place of Payment is set at the Seller's registered address in Spain.

Payment shall be made in the manner and the terms established by the Seller in the invoice for the sale of the merchandise.

The delay in the payment of the invoices issued, even if it were partial, exceeding the agreed maturity, will immediately accrue a default interest, calculated according to the legal interest of the money calculated annually in Spain with an increase of 6 basic points. In addition, the non-payment or delay in the payment of all or part of the invoices - whatever the reason - will entitle the Seller to request the advance payment for the outstanding supplies and / or to proceed with the termination of the contract, which will release the latter from the obligation to comply with other possible contractual obligations, and will be likewise entitled to cancel the supply of other possible pending orders, without the Buyer being able to request any type of compensation from the Seller.

6. GUARANTEE

The materials supplied meet the quality requirements established in the current standards EN-14411 and UNE-EN-ISO 10545. Quality assurance is limited to first quality materials, with a maximum allowable tolerance of approximately 5% (five percent). Any guarantee in respect of defects in second or third quality materials or special sale lots is expressly excluded.

Any claims for defects shall be necessarily notified by registered letter sent to the Seller's registered office, made before the material is mounted and, in any case, within 10 days from receipt of the material.

Any claims of installed material will not be accepted. Any claims for visible or hidden defects will not be valid once the material has been installed and the Guarantee will be automatically invalidated. It is the Buyer's responsibility to check that the material is in perfect condition before installing it.

The Guarantee includes only the cleaning and / or repair of material and, failing that, the return of the material with manufacturing defects, which do not comply with the current technical standards EN-14411 and UNE-EN-ISO 10545, excluding any other obligation of the Seller. The Quality Guarantee will cover any defects of the material, exclusively when these are derived from the manufacturing process. Likewise, the Seller is exempt from liability arising from any deficiencies or defects of the product due to other causes, besides the manufacturing process.

Any possible claims on the material will not give the Buyer any right to interrupt or delay, totally or partially, the payment that will have to be made within the established deadlines.

7. ARBITRATION CLAUSE

Any dispute arising in respect of the product of the Seller and the guarantee thereof, including, without limitation, any damages that are not solved amicably between the parties, shall be submitted to arbitration. The arbitration proceedings will be held before an arbitrator. The arbitration proceedings will be conducted in accordance with the rules and regulations of the Court of Arbitration, located in the Chamber of Commerce of Castellón (Spain). All parties unconditionally accept the provisions of this paragraph.

8. PROHIBITION TO EXPORT

Except in the case of other specific agreements, the Buyer shall not export the materials supplied by our Company, or transfer them to any companies or individuals for the purpose of exportation.

9. VALIDITY OF GENERAL CONDITIONS OF SALE

The aforementioned general conditions of sale are an integral part of the sale agreement and to all effects are binding for the Seller and the Buyer, moreover they faithfully represent the contractual will of the parties. The Buyer declares his specific approval.

The confirmation of the Order or Pro forma invoice by the Buyer, implies the acceptance of the general conditions of sale.

APAVISA PORCELÁNICO S.L. assumes no liability for any printing errors. The technical characteristics contained in this catalog are mean values of our products. To carry out any orders that are requested consultations with the technical characteristics of the particular model to APAVISA PORCELANICO S.L. All features and specifications are based on information available at the time of printing this folder and may be changed without notice, according to market conditions, technological innovations and/or any other factor, without incurring any liability.

Condiciones Generales De Venta

1. REGLAMENTACIÓN PARA CONTRATAR

Las condiciones generales de venta aquí detalladas, excepto las posibles modificaciones o excepciones acordadas por escrito, regirán todos los contratos de venta celebrados entre APAVISA PORCELANICO S.L (en adelante, el Vendedor) y el Comprador. Cualquier variación de las condiciones generales de venta, ofertas, transacciones, créditos o descuentos, acordados por los Agentes u otros intermediarios del Vendedor, no se considerarán válidos sin la confirmación por escrito del personal de la Oficina Central del Vendedor.

2. PEDIDOS DE COMPRA Y SUMINISTRO

Solo las órdenes de compra recibidas por escrito serán válidas, y estarán sujetas a la aceptación del Vendedor mediante la Confirmación de la Orden. El suministro incluirá solo los servicios, materiales y cantidades especificados en la Confirmación del pedido o en otras comunicaciones escritas por parte del Vendedor. Si hubiera alguna diferencia en la solicitud de pedido o en la Orden de compra, la confirmación del pedido o la factura pro forma se considerarán el único documento válido. Una confirmación parcial del pedido comunicada por escrito por el vendedor significa que la aprobación es parcial y no implica ni implica la confirmación del resto del pedido solicitado.

3. ENTREGA

A menos que se acuerde expresamente lo contrario, el lugar de carga y los términos de venta del Vendedor se indicarán en la factura y las condiciones de entrega serán "Ex Works" de acuerdo con las reglas de INCOTERMS de la Cámara de Comercio Internacional. En cualquier caso, la responsabilidad total por el deterioro, rotura o pérdida del producto durante la carga y el transporte correrá a cargo del Comprador. El comprador debe verificar la integridad de la mercancía dentro de un periodo máximo de 24 horas desde la recepción. Cualquier material roto o faltante comunicado posteriormente se entenderá como no atribuible ni responsabilidad del Vendedor. Los costos de la devolución de la mercancía debido a cualquier error o causas ajenas a la responsabilidad o control del Vendedor, correrán a cargo del Comprador.

4. TÉRMINOS DE ENTREGA

El plazo de entrega será acordado por las partes contratantes. Siempre que no se hayan incluido cláusulas especiales, el plazo de entrega será solo para fines informativos y no se entenderá como obligatorio ni obligatorio. Cualquier evento de fuerza mayor interrumpirá el plazo de entrega mientras dure el evento. Si, como resultado de fuerza mayor, el contrato no puede ejecutarse dentro de los 60 días de la fecha acordada, cada parte tendrá derecho a rescindir el contrato. En tal caso, la declaración de terminación debe enviarse a la otra parte por carta certificada con acuse de recibo dentro de los 10 días posteriores a la expiración de dicho período de 60 días, excluyendo cualquier derecho recíproco de compensación o reparación de daños sufridos.

5. PRECIOS Y PAGOS

El precio válido será establecido por el Vendedor en la factura correspondiente. El lugar de pago se establece en la dirección registrada del vendedor en España.El pago se realizará de la manera y los términos establecidos por el Vendedor en la factura por la venta de la mercancía. El retraso en el pago de las facturas emitidas, incluso si fuera parcial, superando el vencimiento acordado, devengará inmediatamente un interés de demora, calculado de acuerdo con el interés legal del dinero calculado anualmente en España con un aumento de 6 puntos básicos. Además, la falta de pago o la demora en el pago de la totalidad o parte de las facturas, sea cual sea el motivo, dará derecho al Vendedor a solicitar el pago por adelantado de los suministros pendientes y / o proceder con la terminación del contrato, que eximirá a este último de la obligación de cumplir con otras posibles obligaciones contractuales, y también tendrá derecho a cancelar el suministro de otros posibles pedidos pendientes, sin que el Comprador pueda solicitar ningún tipo de compensación al Vendedor.

6. GARANTÍA

Los materiales suministrados cumplen los requisitos de calidad establecidos en las normas actuales EN-14411 y UNE-EN-ISO 10545. El aseguramiento de la calidad se limita a los materiales de primera calidad, con una tolerancia máxima permitida de aproximadamente el 5% (cinco por ciento). Se excluye expresamente cualquier garantía con respecto a defectos en materiales de segunda o tercera calidad o lotes de venta especial. Cualquier reclamo por defectos se notificará necesariamente mediante una carta certificada enviada a la oficina registrada del Vendedor, hecha antes de que se monte el material y, en cualquier caso, dentro de los 10 días posteriores a la recepción del material. No se aceptarán reclamaciones de material instalado. Cualquier reclamo por defectos visibles u ocultos no será válido una vez que se haya instalado el material y la Garantía se invalidará automáticamente. Es responsabilidad del Comprador verificar que el material esté en perfectas condiciones antes de instalarlo. La Garantía incluye solo la limpieza y / o reparación de material y, en su defecto, la devolución del material con defectos de fabricación, que no cumplan con las normas técnicas actuales EN-14411 y UNE-EN-ISO 10545, excluyendo cualquier otra obligación del vendedor. La Garantía de Calidad cubrirá cualquier defecto del material, exclusivamente cuando se derive del proceso de fabricación. Asimismo, el Vendedor está exento de responsabilidad derivada de cualquier deficiencia o defecto del producto debido a otras causas, además del proceso de fabricación. Cualquier posible reclamo sobre el material no le dará al Comprador ningún derecho de interrumpir o retrasar, total o parcialmente, el pago que deberá realizarse dentro de los plazos establecidos.

7. ARBITRAJE

Cualquier disputa que surja con respecto al producto del Vendedor y la garantía del mismo, incluidos, entre otros, los daños que no se resuelvan amigablemente entre las partes, se someterán a arbitraje. El procedimiento de arbitraje se llevará a cabo ante un árbitro. Los procedimientos de arbitraje se llevarán a cabo de conformidad con las normas y reglamentos de la Corte de Arbitraje, ubicada en la Cámara de Comercio de Castellón (España). Todas las partes aceptan incondicionalmente las disposiciones de este párrafo.

8. PROHIBICIÓN A LA EXPORTACIÓN

Excepto en el caso de otros acuerdos específicos, el Comprador no exportará los materiales suministrados por nuestra Compañía, ni los transferirá a ninguna compañía o individuo con el propósito de exportarlos.

9. VALIDEZ DE LAS CONDICIONES GENERALES DE VENTA

Las condiciones generales de venta mencionadas anteriormente son una parte integral del acuerdo de venta y, a todos los efectos, son vinculantes para el Vendedor y el Comprador, además representan fielmente la voluntad contractual de las partes. El comprador declara su aprobación específica. La confirmación del pedido o factura pro forma por parte del comprador implica la aceptación de las condiciones generales de venta.

APAVISA PORCELÁNICO S.L. no asume ninguna responsabilidad por posibles errores de impresión. Las características técnicas que constan en el presente catálogo son valores medios de nuestros productos. Para la realización de cualquier pedido se solicita que sean consultadas las características técnicas del modelo en concreto a APAVISA PORCELÁNICO S.L.
